SUMMARY

Early-career GenAI Engineer with internship experience building RAG pipelines, multi-agent workflows, and applied ML models in production settings. Hands-on with LangChain, LlamaIndex, Pinecone, and AWS. Completing an M.Sc. in Big Data Analytics with a Generative AI specialization.

SKILLS

Languages: Python (Pandas, NumPy, scikit-learn), SQL, R

AI / LLM: LangChain, LlamaIndex, RAG Pipelines, Prompt Engineering, Pinecone, LLM APIs (OpenAI, Gemini, Groq, Cohere), Flowise, AI Agents

ML / Deep Learning: TensorFlow, Keras, PyTorch, Random Forest, SVM, Logistic Regression, CNNs, Transfer Learning, Time Series Forecasting

Cloud / MLOps: AWS (EC2, S3, Terraform, CLI), Docker, FastAPI, Streamlit, HuggingFace Spaces, n8n, Supabase, Git

Data & Analytics: Power BI, Tableau, Excel, A/B Testing, KPI Tracking, Data Storytelling

EXPERIENCE

AI / GenAI Engineer Intern — Trigent Software Pvt Ltd

Jan 2026 - Mar 2026 · Bengaluru

- Built a RAG pipeline (LangChain, Pinecone) enabling sub-second document retrieval across enterprise knowledge stores, handling chunking and embedding generation for healthcare use cases.
- Developed a fraud detection model (Random Forest, Logistic Regression) that flagged transaction anomalies at 95%+ accuracy, deployed via a real-time Streamlit dashboard for internal review.
- Contributed to clinical AI tools for medication safety, chemotherapy toxicity monitoring, and dialysis risk scoring — plus a rare-disease diagnostic prototype using OCR and HPO symptom mapping — using n8n, Supabase, and Streamlit to surface real-time alerts.
- Built a medical report summarization tool and sentiment-analysis engine (LangChain, Flowise) to support clinical documentation review.
- Audited and resolved issues across 800+ automation workflows, improving reliability of production pipelines.

PROJECTS

Handwriting-Based Parkinson's Disease Detection — Tools: Python, TensorFlow, Keras, scikit-learn, ResNet50, SVM, Flask

- Built a ResNet50 + SVM hybrid model to classify Parkinson's Disease from handwriting images, reaching 97.47% accuracy (AUC 0.989) via stratified 5-fold cross-validation.
- Expanded the training set from 3,500 to 7,100+ images using transfer learning and data augmentation, reducing overfitting; deployed as a Flask app for real-time inference.

A/B Testing — E-Commerce Landing Page Conversion — Tools: Python, Pandas, Statsmodels, Matplotlib, Excel

- Ran a two-proportion z-test to measure the impact of a new landing page on conversion rate, delivering findings that guided the product team's redesign decision.

EV Adoption & Air Quality Analysis — Bengaluru — Tools: Python, Pandas, NumPy, Matplotlib, scikit-learn, Excel

- Analyzed 6 years (2018–2024) of EV adoption and air quality data to quantify the impact of EV policy interventions, and built forecasting models for future PM2.5 reduction under different policy scenarios.

EDUCATION

M.Sc. Big Data Analytics (Generative AI)

St Joseph's University, Bengaluru · SGPA: 8.06/10

Jul 2024 - Present

B.Sc. Statistics & Mathematics

Mount Carmel College, Bengaluru · SGPA: 6.91/10

Aug 2021 - Apr 2024

CERTIFICATIONS & LEADERSHIP

Google Analytics Certification (Great Learning); Goldman Sachs Excel Skills for Business (Forage)

Head of Media & Marketing Committee, Datagram 7.0, St. Joseph's University; Core Team Member, Reel Run Association & Mathematics Association, Mount Carmel College
