Professional Summary

Data Analyst with a background in Statistics and Big Data Analytics, skilled in Python, SQL, Excel, Power BI, Tableau, and statistical analysis. Experienced in transforming complex datasets into actionable business insights through dashboards, forecasting, A/B testing, and data visualization. Strong foundation in analytics, reporting, and decision-making support.

Technical Skills

Languages & Analytics: Python (Pandas, NumPy, scikit-learn), SQL, R, Excel (Pivot Tables, VLOOKUP, Dashboards)

Business Intelligence & Visualization: Power BI, Tableau, Matplotlib, KPI Tracking, Dashboard Development, Data Storytelling

Statistical Analysis: Hypothesis Testing, A/B Testing, Regression Analysis, ANOVA, Time Series Forecasting, Predictive Analytics

Machine Learning: Random Forest, Logistic Regression, SVM, CNNs, ResNet50, TensorFlow, Keras

Data Engineering & Processing: ETL Workflows, Data Cleaning, Data Wrangling, Data Pipelines, Document Parsing, OCR

Cloud & Tools: AWS (EC2, S3, Terraform, AWS CLI), Git, Docker, Streamlit, Flask

Additional Technologies: LangChain, LlamaIndex, Flowise, Pinecone, OpenAI APIs, Supabase, n8n

Soft Skills: Analytical Thinking, Problem Solving, Technical Communication, Stakeholder Management, Team Collaboration

Experience

AI / GenAI Engineer Intern | *Trigent Software Pvt Ltd*

Jan 2026 – Mar 2026 • Bengaluru

- Analyzed structured and unstructured datasets using Python to support healthcare and business intelligence initiatives.
- Built interactive dashboards and reporting solutions for fraud detection and operational monitoring, enabling data-driven decision-making.
- Developed machine learning models using Random Forest and Logistic Regression for fraud detection, achieving over 95% prediction accuracy while reducing false positives.
- Processed, transformed, and validated enterprise datasets for analytics and reporting applications.
- Designed healthcare monitoring solutions for medication safety, renal dose adjustment, and clinical risk assessment using data-driven methodologies.
- Collaborated with cross-functional teams to deliver insights through dashboards and analytical reports.
- Validated and debugged over 800 enterprise automation workflows, improving data quality, system reliability, and operational efficiency.
- Supported predictive analytics initiatives by integrating multiple data sources and generating actionable business insights.

Projects

EV Adoption & Air Quality Analysis — Electrifying Bengaluru

Tools: Python, Pandas, NumPy, Matplotlib, scikit-learn, Excel

- Analyzed six years (2018–2024) of EV adoption and air quality data to identify trends and evaluate environmental impact.
- Performed data cleaning, preprocessing, and exploratory analysis on large datasets.
- Built forecasting models to predict EV penetration and PM2.5 reduction under different policy scenarios.
- Developed visualizations and reports that translated analytical findings into infrastructure planning recommendations.

Handwriting-Based Parkinson's Disease Detection

Tools: Python, TensorFlow, Keras, scikit-learn, ResNet50, SVM, Flask

- Engineered a ResNet50 + SVM hybrid deep learning model to classify Parkinson's Disease from handwriting images, achieving 97.47% accuracy and AUC of 0.989 using stratified 5-fold cross-validation.
- Applied transfer learning and data augmentation to expand dataset from 3,500 to 7,100+ images, significantly improving model generalization and reducing overfitting.
- Shipped model as a Flask web application for real-time diagnostic inference.

A/B Testing — E-Commerce Landing Page Conversion Optimization

Tools: Python, Pandas, Statsmodels, Matplotlib, Excel

- Designed and executed statistical A/B tests using two-proportion z-tests to evaluate landing page performance.
- Cleaned and analyzed user behavior data to measure conversion improvements.
- Presented findings through visualizations and reports, enabling data-driven product decisions.

American Sign Language (ASL) Recognition Web App

Tools: Python, TensorFlow, Keras, OpenCV, Flask, NumPy

- Developed a CNN-based real-time gesture recognition system with an optimized preprocessing pipeline.
- Improved model performance through data augmentation and deployment via Flask.

Cloud-Deployed Appointment Booking Web App

Tools: Python, Flask, SQLAlchemy, SQLite, AWS EC2, HTML, Git

- Developed a full-stack appointment booking application with database management and payment gateway integration.
- Automated email notifications and deployed the application on AWS EC2 with production-ready configuration.

Education

M.Sc. in Big Data Analytics | *St Joseph's University, Bengaluru* Jul 2024 – May 2026 • SGPA: 8.06

B.Sc. in Statistics & Mathematics | *Mount Carmel College, Bengaluru* Aug 2021 – Apr 2024 • SGPA: 6.91

Certifications

- Google Analytics Certification — Great Learning
- Goldman Sachs Excel Skills for Business — Forage

Leadership & Activities

- Head of Media & Marketing Committee — Datagram 7.0, St. Joseph's University
- Core Team Member — Reel Run Association & Mathematics Association, Mount Carmel College
- Student Intern — Under25 Summit 2023
